

Simply Clean  
Experience the difference

**Covid-19 Deep Cleaning and Fogging Services**

## Eliminate viruses

Keeping your home or business premises germ and virus free is essential during the Covid-19 pandemic.

Simply Clean Aberdeen can help you or your business with our special **Covid-19 Deep Cleaning and Fogging services.**

Using the very latest cleaning products and equipment, we have created a thorough cleaning service that will ensure your business or home is fully protected.

Our specialised cleaning equipment and PPE allows us to clean your premises to the very highest standard, **killing 99.99% of pathogens**, with the least amount of disruption to you.

# STOP CORONAVIRUS

# What is fogging?

- ▶ The **fogging process** involves spraying a fog of fine mist into the air which eliminates all pathogens present. The airborne sanitising mist leaves a deposit on all surface areas including areas that are difficult to reach through conventional cleaning.
- ▶ The **fogging machine** is a versatile and highly effective piece of equipment that applies a fine sanitising solution to surfaces in a matter of minutes; this is something which has become an increased requirement as a result of the Covid-19 outbreak.
- ▶ The **fogging mist** can remain in the air long enough to kill airborne viral and bacterial contamination. Walls, ceilings, floors, carpets, soft fabrics and hard surfaces are all subjected to the fogging process. This process will leave surfaces virus and bacteria free, killing **99.99% of pathogens**.

# Commercial Premises

## ► RETURN TO WORK

When your employees make a physical return to the office, they will want reassurance to know they're returning to a hygienic and sanitised place of work which is protected from Covid-19 and other harmful infections.

## ► PEACE OF MIND

We are providing a comprehensive fogging and deep clean service for businesses who want to have peace of mind when preparing for employees to return to work. This service can also be extended during normal business operations as required.

The deep clean will include a full desk sanitisation, of keyboards, phones, desks and screens, as well as all other parts of your premises, with focus on touch points.

## Residential Properties

### ► DOMESTIC USE

If you are moving into a new home, have a rental property or simply want to have your house sanitised, then our Deep Cleaning and Fogging services can help you.

### ► PEACE OF MIND

Our specialist fogging equipment can sanitise the rooms in your property and the contents. Providing you with peace of mind knowing that your cleaning has been carried out to the highest level of sanitisation available on the market.

# Sanitising Formula

- ▶ We use a highly effective sanitising formula called V2 Antiviral Disinfectant. This specialist formula can kill a wide range of pathogenic viruses in under 5 minutes.
- ▶ V2 Antiviral Disinfectant is independently tested to European standards against Coronavirus. This solution is suitable for use on all surfaces, including food preparation and medical environments, leaving treated areas safe for human contact.
